Reason for Revision	Compliance

In accordance with the Rules and Procedures of the 2015-2020 Council of Experts, the Chemical Medicines Monographs 5 Expert Committee has revised the Dutasteride monograph. The purpose of this revision is to accommodate a different hydrate form of dutasteride. The Expert Committee has revised the Dutasteride monograph to include the following:

- Addition of acceptance criteria for the hydrate form in the test for *Water Determination*
- The *Labeling* section was revised to include the hydrate form.

The Dutasteride Revision Bulletin supersedes the currently official monograph. The Revision Bulletin will be incorporated into the *Second Supplement* to *USP 40-NF 35*.

Should you have any questions, please contact Mary Koleck, Ph.D., Scientific Liaison (301-230-7420 or mpk@usp.org).
