Glycine

Type of Posting: Notice of Intent to Revise
Posting Date: 01–Jun–2018
Targeted Official Date: 01–Aug–2018, Revision Bulletin Postponement
Expert Committee: Non-Botanical Dietary Supplements

In accordance with the Rules and Procedures of the 2015–2020 Council of Experts, the Non-Botanical Dietary Supplements Expert Committee has postponed the official date of the acceptance criteria for monochloroacetic acid and any unspecified impurity, listed in Table 2 under the Related Compounds section of the Glycine monograph, published in *First Supplement* to *USP 41–NF 36*.

USP has received comments regarding the implementation of the acceptance criteria for these two impurities. Additional input from stakeholders is required in order to resolve the concerns raised. Interested parties are invited to contact USP for additional information on this topic and to get involved in the dialog on the path forward for the glycine two targeted impurities.

The Glycine Revision Bulletin postpones the implementation of the acceptance criteria for monochloroacetic acid and any unspecified impurity becoming official in *First Supplement* to *USP 42–NF37*.

Should you have any questions, please contact Huy Dinh, Senior Scientific Liaison (301–816–8594) or htd@usp.org.)
