

Revision to USP Pending Monographs Guideline

Type of Posting: General Announcement

Posting Date: 09–Nov–2009

USP has revised the Pending Monographs Guideline to indicate the implementation period for a Pending Monograph advancing to official United States Pharmacopeia status via Revision Bulletin. The Guideline now states that "the monograph is official and legally enforceable as a USP monograph as of the date specified in the Revision Bulletin which will be no less than six months after the posting of the Revision Bulletin". This six-month implementation period is consistent with that of the *USP–NF* annual edition and its Supplements.

This version updates and replaces USP Pending Monographs Guideline Version 2.3 as of October 1, 2009.
