

Acetaminophen Oral Suspension

Type of Posting	Revision Bulletin
Posting Date	29-Oct-2021
Official Date	1-Nov-2021
Expert Committee	Small Molecules 2

In accordance with the Rules and Procedures of the Council of Experts, the Small Molecules 2 Expert Committee has revised the Acetaminophen Oral Suspension monograph. On the basis of comments received, the implementation of the new gradient HPLC procedure for the *Assay*, addition of the test for *Organic Impurities*, and the omission of the original *Assay* procedure and the test for *4-Aminophenol in Acetaminophen-Containing Drug Products* in the monograph have been [postponed](#). The purpose for the revision is to add clarity by removing the postponed content from the monograph so that only the official content is contained within the version marked as “Currently Official” in *USP-NF* Online as the postponed content will not be reinstated.

The Acetaminophen Oral Suspension Revision Bulletin supersedes the currently official monograph.
