

## Acetazolamide Extended-Release Capsules

<b>Type of Posting</b>	Revision Bulletin
<b>Posting Date</b>	28-Jun-2024
<b>Official Date</b>	1-Jul-2024
<b>Expert Committee</b>	Small Molecules 3

In accordance with the Rules and Procedures of the Council of Experts, the Small Molecules 3 Expert Committee has revised the Acetazolamide Extended-Release Capsules monograph. The purpose of this revision is to add *Dissolution Test 4* to accommodate FDA-approved drug products with different dissolution conditions and/or tolerances than the existing dissolution test(s). This revision also necessitates a change in the table numbering. Existing references to reagents and reagent names have been updated for consistency with official reagent entry names.

- *Dissolution Test 4* was validated using the Kromasil KR100-5-C18 brand of column with L1 packing. The typical retention time for acetazolamide is about 3 min.

The Acetazolamide Extended-Release Capsules Revision Bulletin supersedes the currently official monograph.
