

Codeine Phosphate

Type of Posting	Revision Bulletin
Posting Date	30-Apr-2021
Official Date	1-May-2021
Expert Committee	Small Molecules 2

In accordance with the Rules and Procedures of the Council of Experts, the Small Molecules 2 Expert Committee has revised the Codeine Phosphate monograph. The purpose of the revision is to change the acceptance criteria for Codeine methyl ether from NMT 0.15% to NMT 0.45% in *Table 2* under the test for *Organic Impurities*. The change accommodates Codeine Phosphate referenced in FDA-approved products that have a different acceptance criterion for this impurity than the one in the monograph.

The Codeine Phosphate Revision Bulletin supersedes the currently official monograph.
