In accordance with the Rules and Procedures of the Council of Experts, the Small Molecules 5 Expert Committee has revised the Dexamethasone Tablets monograph. The purpose of this revision is to add *Dissolution Test 3* to accommodate FDA-approved drug products with different dissolution conditions and/or tolerances than the existing dissolution test(s).

- *Dissolution Test 3* was validated using the Hypersil ODS brand of column with L1 packing. The typical retention time for dexamethasone is about 4 min.

The Dexamethasone Tablets Revision Bulletin supersedes the currently official monograph.
