

Diclofenac Sodium Extended-Release Tablets

Type of Posting	Revision Bulletin
Posting Date	22-Nov-2024
Official Date	1-Dec-2024
Expert Committee	Small Molecules 2

In accordance with the Rules and Procedures of the Council of Experts, the Small Molecules 2 Expert Committee has revised the Diclofenac Sodium Extended-Release Tablets monograph. The purpose of this revision is to add *Dissolution Test 5* to accommodate FDA-approved drug products with different dissolution conditions and/or tolerances than the existing dissolution test(s). Existing references to reagents have been updated for consistency with the reagent entry. The revision also necessitates a change in the table numbering.

- *Dissolution Test 5* was validated using the Waters Symmetry C18 brand of column with L1 packing. The typical retention time for diclofenac is about 3 min.

The Diclofenac Sodium Extended-Release Tablets Revision Bulletin supersedes the currently official monograph.
