Type of Posting	Revision Bulletin
Posting Date	29-Dec-2017
Targeted Official Date	01-Jan-2018
Expert Committee	Chemical Medicines Monographs 5
Reason for Revision	Compliance

In accordance with the Rules and Procedures of the 2015-2020 Council of Experts, the Chemical Medicines Monographs 5 Expert Committee has revised the Dutasteride monograph.

The purpose of this revision is to widen the limit for the hydrate form of dutasteride from NMT 1.5% to NMT 2.0%, to accommodate the sponsor's FDA approved specification. Text is added to indicate that <921> *Methods Ia* and *Ic* could be used for the hydrate form.

The Dutasteride Revision Bulletin supersedes the currently official monograph. The Revision Bulletin will be incorporated into the *Second Supplement* to *USP 41-NF 36*.

Should you have any questions, please contact Mary Koleck, Ph.D., Scientific Liaison (301-230-7420 or mpk@usp.org.)
