Fenofibrate Capsules

Type of Posting: Revision Bulletin
Posting Date: 30-Apr-2021
Official Date: 1-May-2021
Expert Committee: Small Molecules 2

In accordance with the Rules and Procedures of the Council of Experts, the Small Molecules 2 Expert Committee has revised the Fenofibrate Capsules monograph. The purpose for the revision is to add Dissolution Test 7 to accommodate FDA-approved drug products with different dissolution conditions and/or tolerances than the existing dissolution test(s).

- *Dissolution Test 7* was validated using the Waters Symmetry C18 brand of column with L1 packing. The typical retention time for fenofibrate is about 8 min.

Existing references to reagents and reagent names have been updated for consistency with the full official reagent entry names. For additional information about reagent cross references, please see the related Compendial Notice.

The Fenofibrate Capsules Revision Bulletin supersedes the currently official monograph.

Should you have any questions, please contact Tsion Bililign, Senior Scientist II (301-816-8286 or tb@usp.org).
