

## Fenofibrate Capsules

<b>Type of Posting</b>	Revision Bulletin
<b>Posting Date</b>	30-Apr-2021
<b>Official Date</b>	1-May-2021
<b>Expert Committee</b>	Small Molecules 2

In accordance with the Rules and Procedures of the Council of Experts, the Small Molecules 2 Expert Committee has revised the Fenofibrate Capsules monograph. The purpose for the revision is to add *Dissolution Test 7* to accommodate FDA-approved drug products with different dissolution conditions and/or tolerances than the existing dissolution test(s).

- *Dissolution Test 7* was validated using the Waters Symmetry C18 brand of column with L1 packing. The typical retention time for fenofibrate is about 8 min.

Existing references to reagents and reagent names have been updated for consistency with the full official reagent entry names. For additional information about reagent cross references, please see the related [Compendial Notice](#).

The Fenofibrate Capsules Revision Bulletin supersedes the currently official monograph.

Should you have any questions, please contact Tsion Billign, Senior Scientist II (301-816-8286 or [tb@usp.org](mailto:tb@usp.org)).
