

## <621> Chromatography

<b>Type of Posting</b>	Revision Bulletin
<b>Posting Date</b>	31-Mar-2023
<b>Official Date</b>	1-Apr-2023
<b>Expert Committee</b>	General Chapters - Chemical Analysis

In accordance with the Rules and Procedures of the Council of Experts, the General Chapters - Chemical Analysis Expert Committee has revised the chapter <621> Chromatography (See [Notice of Intent to Revise](#)). The purpose of this revision is to introduce a change in the calculation of the *Signal-to-noise ratio* under *Definitions*. The revision indicates that the noise should be calculated on a window of at least 5 times the peak width at half height. *Figures 6 and 7* were also revised to be consistent with the updated *Signal-to-noise* definition.

The <621> Chromatography Revision Bulletin supersedes the currently approved harmonized chapter.

Should you have any questions, please contact Horacio Pappa, Senior Director, General Chapters (301-816-8319 or [hp@usp.org](mailto:hp@usp.org)).
