In accordance with the Rules and Procedures of the Council of Experts, the Small Molecules 2 Expert Committee has revised the Guanfacine Tablets monograph. The purpose of this revision is to add Dissolution Test 2 to accommodate FDA-approved drug products with different dissolution conditions and/or tolerances than the existing dissolution test(s). Labeling information has been incorporated to support the inclusion of Dissolution Test 2.

- Dissolution Test 2 was validated using the Microbondapack C18 brand of column with L1 packing. The typical retention time for guanfacine is about 3 min.

Additional editorial changes were made to update the monograph to current USP style.

The Guanfacine Tablets Revision Bulletin supersedes the currently official monograph.
