

Ipratropium Bromide

Type of Posting	Revision Bulletin
Posting Date	28-Jul-2023
Official Date	1-Aug-2023
Expert Committee	Small Molecules 5

In accordance with the Rules and Procedures of the Council of Experts, the Small Molecules 5 Expert Committee has revised the Ipratropium Bromide monograph. The purpose of this revision is to address the inadvertent omission of the currently official test for *Water Determination* <921>, *Method I* from *USP–NF 2023 Issue 2*, becoming official on August 1, 2023. Specifically, a revision for *Specific Tests* was proposed in *PF 47(6)* to delete the *pH* test, and ultimately was approved by the Expert Committee. However, the *Water Determination* test was inadvertently omitted when the monograph was published as final approved text in the *USP–NF 2023 Issue 2* version.

The Ipratropium Bromide monograph Revision Bulletin supersedes the currently official Ipratropium Bromide monograph.
