| Expert Committee | Complex Excipients |

In accordance with the Rules and Procedures of the Council of Experts, the Complex Excipients Expert Committee has revised the Lauroyl Polyoxyglycerides monograph. The purpose of the revision is to replace the incorrect reference to *USP Lauroyl Polyoxyglycerides 300 RS* for the Lauroyl Polyoxyglycerides 1500 sample with a correct reference to *USP Lauroyl Polyoxyglycerides 1500 RS* in the *Standard solution* description within the *Thin-Layer Chromatographic Identification Test*.

The Lauroyl Polyoxyglycerides Revision Bulletin supersedes the current version of the monograph which became official on Nov 1, 2020.

Should you have any questions, please contact Peng Zhang, Staff Scientist (301-692-3454 or pgz@usp.org).
