

Magnesium Oxide

Type of Posting	Revision Bulletin
Posting Date	19-Nov-2021
Official Date	1-Dec-2022
Expert Committee	Small Molecules 3

In accordance with the Rules and Procedures of the Council of Experts, the Small Molecules 3 Expert Committee has revised the Magnesium Oxide monograph. The purpose of this revision is to revert portions of the monograph to the previous version that was official prior to June 1, 2021.

This includes removing *Identification B*, reverting the *Assay* from ion chromatography to titration, reverting the *Limit of Calcium* test from ion chromatography to atomic absorption spectrometry, and removing the *USP Reference Standards* section.

Additionally, minor editorial changes have been made to update the monograph to current *USP* style.

The Magnesium Oxide Revision Bulletin supersedes the currently official monograph and becomes official on December 1, 2022. USP encourages early adoption by stakeholders as outlined in the *USP General Notices 3.10. Applicability of Standards*.
