In accordance with the Rules and Procedures of the Council of Experts, the Small Molecules 2 Expert Committee has revised the Metoprolol Succinate Extended-Release Tablets monograph. The purpose of this revision is to add *Dissolution Test 9* to accommodate FDA-approved drug products with different dissolution conditions and/or tolerances than the existing dissolution test(s). The revision also necessitates a change in the table numbering in the test for *Organic Impurities*.

- *Dissolution Test 9* was validated using the Ultimate XB-C8 brand of column with L7 packing. The typical retention time for metoprolol succinate is about 2.5 min.

The Metoprolol Succinate Extended-Release Tablets Revision Bulletin supersedes the currently official monograph.
