Minocycline Hydrochloride Extended-Release Tablets

**Type of Posting**  Notice of Intent to Revise

**Posting Date**  29–Mar–2019

**Targeted Official Date**  To Be Determined, Revision Bulletin

**Expert Committee**  Chemical Medicines Monographs 1

In accordance with section 7.04 (c) of the 2015–2020 Rules and Procedures of the Council of Experts and the Pending Monograph Guideline, this is to provide notice that the Chemical Medicines Monographs 1 Expert Committee intends to revise the Minocycline Hydrochloride Extended-Release Tablets monograph.

Based on the supporting data received from a manufacturer awaiting FDA approval, the Expert Committee proposes to add *Dissolution Test 5* to the monograph.

The revision also necessitates a change in the table numbering in the test for *Organic Impurities*.

The proposed revision is contingent on FDA approval of a product that meets the proposed monograph specifications. The proposed revision will be published as a Revision Bulletin and an official date will be assigned to coincide as closely as possible with the FDA approval of the associated product.

See below for additional information about the proposed text.¹

Should you have any questions, please contact Praveen Pabba, Scientific Liaison to the Chemical Medicines Monographs 1 Expert Committee (301-816-8540 or pkp@usp.org).

¹ This text is not the official version of a *USP–NF* monograph and may not reflect the full and accurate contents of the currently official monograph. Please refer to the current edition of the *USP–NF* for official text.

USP provides this text to indicate changes that we anticipate will be made official once the product subject to this proposed revision under the Pending Monograph Program receives FDA approval. Once FDA approval is granted for the associated revision request, a Revision Bulletin will be posted that will include the changes indicated herein, as well as any changes indicated in the product’s final approval, combined with the text of the monograph as effective on the date of approval. Any revisions made to a monograph under the Pending Monograph Program that are posted without prior publication for comment in the *Pharmacopeial Forum* must also meet the requirements outlined in the *USP Guideline on Use of Accelerated Processes for Revisions to the USP–NF*. 
Minocycline Hydrochloride Extended-Release Tablets

**DEFINITION**
Minocycline Hydrochloride Extended-Release Tablets contain NLT 90.0% and NMT 110.0% of the labeled amount of minocycline (C18H12N2O5).

**IDENTIFICATION**
- **A.** The retention time of the major peak of the Sample solution corresponds to that of the Standard solution, as obtained in the Assay.
- **B.** The UV absorption spectrum of the major peak of the Sample solution and that of the Standard solution exhibit maxima and minima at the same wavelengths, as obtained in the Assay.

**ASSAY**
- **PROCEDURE**
  Protect solutions containing minocycline from light.
  **Buffer:** 3.5 g/L of tetrabutylammonium hydrogen sulfate, 2 g/L of anhydrous citric acid, and 6.8 g/L of monobasic potassium phosphate. Adjust with 10 N sodium hydroxide to a pH of 7.0.
  **Mobile phase:** Acetonitrile and Buffer (24:76)
  **Diluent:** Acetonitrile and water (20:80)
  **Standard solution:** 0.045 mg/mL of minocycline from USP Minocycline Hydrochloride RS in Diluent. Store at 4°C and use within 24 h.
  **Sample stock solution:** Nominally about 0.9 mg/mL of minocycline from Tablets prepared as follows. Transfer a suitable portion of finely powdered Tablets (NLT 10) to a suitable volumetric flask. Add acetonitrile, using 20% of the final volume, and mix vigorously for 15 min. Add water, using 65% of the final volume, and mix vigorously for 30 min. Dilute with water to volume and mix.
  **Sample solution:** Nominally 0.045 mg/mL of minocycline from Sample stock solution in Diluent. Centrifuge and use the clear supernatant. Store at 4°C and use within 24 h.
  **Chromatographic system**
  (See Chromatography (621), System Suitability.)
  **Mode:** LC
  **Detector:** UV 277 nm. When this procedure is used for Identification test B, use a diode array detector set at 200–400 nm.
  **Column:** 4.6-mm × 15-cm; 5-µm packing L1
  **Temperatures**
  **Column:** 35°C
  **Autosampler:** 4°C
  **Flow rate:** 1.3 mL/min
  **Injection volume:** 10 µL
  **System suitability**
  **Sample:** Standard solution
  **Suitability requirements**
  **Tailing factor:** NMT 1.5
  **Relative standard deviation:** NMT 1.0%
  **Analysis**
  **Samples:** Standard solution and Sample solution
  Calculate the percentage of the labeled amount of minocycline (C18H12N2O5) in the portion of Tablets taken:

  \[
  \text{Result} = \left( \frac{r_i}{r_0} \right) \times \left( \frac{C_i}{C_s} \right) \times P \times F \times 100
  \]

  \(r_0\) = peak response from the Sample solution
  \(r_i\) = peak response from the Standard solution
  \(C_s\) = concentration of USP Minocycline Hydrochloride RS in the Standard solution (mg/mL)

  \(C_s = \) nominal concentration of minocycline in the Sample solution (mg/mL)
  \(P = \) potency of minocycline in USP Minocycline Hydrochloride RS (µg/mg)
  \(F = \) conversion factor, 0.001 mg/µg

  **Acceptance criteria:** 90.0%–110.0%

**PERFORMANCE TESTS**

**Change to read:**

- **Dissolution (711)**
  **Test 1**
  Protect solutions containing minocycline from light.
  **Medium:** pH 6.8 phosphate buffer; 900 mL
  **Apparatus 2:** 50 rpm
  **Times:** 1, 2, and 5 h
  **Standard stock solution:** 0.5 mg/mL of minocycline from USP Minocycline Hydrochloride RS in Medium
  **Standard solution:** (L/900) mg/mL of minocycline from Standard stock solution in Medium, where L is the label claim of minocycline in mg/Tablet
  **Sample solution:** Pass a portion of the solution under test through a suitable filter.
  **Instrumental conditions**
  **Mode:** UV
  **Analytical wavelength:** 348 nm
  **Cell:** See Table 1.

  **Table 1**
<table>
<thead>
<tr>
<th>Tablet Strength (mg)</th>
<th>Cell Path Length (cm)</th>
</tr>
</thead>
<tbody>
<tr>

</tbody>
</table>

  **Blank:** Medium
  **Analysis**
  **Samples:** Standard solution, Sample solution, and Blank
  Autozero the instrument using the Blank.
  Calculate the concentration (\(C_i\)) of minocycline (C18H12N2O5) in the sample withdrawn from the vessel at each time point (\(t\)):

  \[
  \text{Result} = \left( \frac{A_i}{A_s} \right) \times C_s \times P \times F
  \]

  \(A_i\) = absorbance of the Sample solution at time point \(i\)
  \(A_s\) = absorbance of the Standard solution
  \(C_s\) = concentration of the Standard solution (mg/mL)
  \(P\) = potency of minocycline in USP Minocycline Hydrochloride RS (µg/mg)
  \(F\) = conversion factor, 0.001 mg/µg

  Calculate the percentage of the labeled amount (\(Q\)) of minocycline (C18H12N2O5) dissolved at each time point (\(t\)):

  \[
  \text{Result}_1 = C_s \times V \times (1/L) \times 100
  \]

  \[
  \text{Result}_2 = \left( (C_s \times [V - (V_s \times V_i)] + (C_s \times V_i)) \times (1/L) \times 100
  \]

  \[
  \text{Result}_3 = \left( ([C_s \times [V - (2 \times V_s)] + C_s \times V_i]) \times (1/L) \times 100
  \]

  \(C_s\) = concentration of minocycline in the portion of sample withdrawn at the specified time point (mg/mL)

2 Minocycline

If the product complies with this test, the labeling indicates that it meets USP Dissolution Test 2.

**Test 2:** If the product complies with this test, the labeling indicates that it meets USP Dissolution Test 2.

Protect solutions containing minocycline from light.

**Medium:** 0.1 N hydrochloric acid; 900 mL

**Apparatus 1:** 100 rpm

**Times:** 1, 2, and 4 h

**Standard solution:** 0.0225 mg/mL of minocycline from USP Minocycline Hydrochloride RS in Medium

**Sample solution:** At the times specified, withdraw 10 mL of the solution under test and replace with 10 mL of Medium. Pass through a suitable filter. Dilute with Medium to a concentration that is similar to that of the Standard solution.

**Instrumental conditions**

**Mode:** UV

**Analytical wavelength:** 348 nm

**Cell:** 1 cm

**Blank:** Medium

**Analysis**

**Samples:** Standard solution and Sample solution

Autozero the instrument using the Blank.

Calculate the concentration (C) of minocycline \((C_2H_3N_2O_2)\) in the sample withdrawn from the vessel at each time point (i):

\[
\text{Result} = \left( A_i / A_0 \right) \times C_i \times D \times P \times F
\]

\(A_i\) = absorbance of the Sample solution at time point i

\(A_0\) = absorbance of the Standard solution

\(C_i\) = concentration of the Standard solution (mg/mL)

\(D\) = dilution factor (mL/mL)

\(P\) = potency of minocycline in USP Minocycline Hydrochloride RS (µg/mg)

\(F\) = conversion factor, 0.001 mg/µg

Calculate the percentage of the labeled amount (Q) of minocycline \((C_2H_3N_2O_2)\) dissolved at each time point (i):

\[
\text{Result}_1 = C_i \times V \times (1/L) \times 100
\]

\[
\text{Result}_2 = [(C_i \times V) + (C_i \times V_j)] \times (1/L) \times 100
\]

\[
\text{Result}_3 = [(C_i \times V) + (C_i + C_j \times V_j)] \times (1/L) \times 100
\]

\(C_i\) = concentration of minocycline in the portion of sample withdrawn at the specified time point (mg/mL)

\(V\) = volume of Medium, 900 mL

\(L\) = label claim (mg/Tablet)

The percentages of the labeled amounts of minocycline \((C_2H_3N_2O_2)\) dissolved at the times specified conform to Dissolution (711), Acceptance Table 2.

**Tolerances:** See Table 2.

**Table 2**

<table>
<thead>
<tr>

</tbody>
</table>

The percentages of the labeled amounts of minocycline \((C_2H_3N_2O_2)\) dissolved at the times specified conform to Dissolution (711), Acceptance Table 2.

**Test 3:** If the product complies with this test, the labeling indicates that it meets USP Dissolution Test 3.

Protect solutions containing minocycline from light.

**Medium:** 0.1 N hydrochloric acid; 900 mL

**Apparatus 1:** 100 rpm

**Times:** 0.5, 1.5, and 4 h

**Standard solution:** 0.021 mg/mL of minocycline from USP Minocycline Hydrochloride RS in Medium

**Sample solution:** At the times specified, withdraw 10 mL of the solution under test and replace with 10 mL of Medium. Pass through a suitable filter. Dilute with Medium to a concentration that is similar to that of the Standard solution.

**Instrumental conditions**

**Mode:** UV

**Analytical wavelength:** 265 nm

**Cell:** 1 cm

**Blank:** Medium

**Analysis**

**Samples:** Standard solution and Sample solution

Autozero the instrument using the Blank.

Calculate the concentration (C) of minocycline \((C_2H_3N_2O_2)\) in the sample withdrawn from the vessel at each time point (i):

\[
\text{Result} = \left( A_i / A_0 \right) \times C_i \times D \times P \times F
\]

\(A_i\) = absorbance of the Sample solution at time point i

\(A_0\) = absorbance of the Standard solution

\(C_i\) = concentration of the Standard solution (mg/mL)

\(D\) = dilution factor (mL/mL)

\(P\) = potency of minocycline in USP Minocycline Hydrochloride RS (µg/mg)

\(F\) = conversion factor, 0.001 mg/µg

Calculate the percentage of the labeled amount (Q) of minocycline \((C_2H_3N_2O_2)\) dissolved at each time point (i):

\[
\text{Result}_1 = C_i \times V \times (1/L) \times 100
\]

\[
\text{Result}_2 = [(C_i \times V) + (C_i \times V_j)] \times (1/L) \times 100
\]

\[
\text{Result}_3 = [(C_i \times V) + (C_i + C_j \times V_j)] \times (1/L) \times 100
\]

\(C_i\) = concentration of minocycline in the portion of sample withdrawn at the specified time point (mg/mL)

\(V\) = volume of Medium, 900 mL

\(L\) = label claim (mg/Tablet)

The percentages of the labeled amounts of minocycline \((C_2H_3N_2O_2)\) dissolved at the times specified conform to Dissolution (711), Acceptance Table 2.

- **Uniformity of Dosage Units (905):** Meet the requirements

**Impurities**

- **Organic Impurities**

Protect solutions containing minocycline from light.

© The United States Pharmacopeial Convention All Rights Reserved.
Buffer, Mobile phase, and Diluent: Prepare as directed in the Assay.

Standard stock solution: Use the Standard solution as directed in the Assay.

Standard solution: 0.009 mg/mL of minocycline from Standard stock solution in Diluent. Store at 4° and use within 24 h.

Sample solution: Use the Sample stock solution as directed in the Assay.

Sensitivity solution: 0.9 µg/mL of minocycline from Standard solution in Diluent. Store at 4° and use within 24 h.

System suitability solution: Heat a portion of the Standard stock solution at 60° for about 2 h and cool. This solution contains a mixture of 4-epiminocycline and minocycline. Store at 4° and use within 24 h.

Chromatographic system: Proceed as directed in the Assay, except use a flow rate of 1 mL/min.

System suitability
Samples: Standard solution, Sensitivity solution, and System suitability solution
Suitability requirements
Resolution: NLT 4.6 between minocycline and 4-epiminocycline, System suitability solution
Tailing factor: NMT 1.5, Standard solution
Relative standard deviation: NMT 2.0%, Standard solution
Signal-to-noise ratio: NLT 10, Sensitivity solution

Analysis
Samples: Standard solution and Sample solution
Calculate the percentage of each impurity in the portion of Tablets taken:

\[
\text{Result} = \left( \frac{r_U}{r_S} \right) \times \left( \frac{C_S}{C_U} \right) \times P \times F \times 100
\]

\[r_U = \text{peak response of each impurity from the Sample solution}\]
\[r_S = \text{peak response of minocycline from the Standard solution}\]
\[C_S = \text{concentration of USP Minocycline Hydrochloride RS in the Standard solution (mg/mL)}\]
\[C_U = \text{nominal concentration of minocycline in the Sample solution (mg/mL)}\]
\[P = \text{potency of minocycline in USP Minocycline Hydrochloride RS (µg/mg)}\]

\[F = \text{conversion factor, 0.001 mg/µg}\]

Acceptance criteria: See Table ▲ 7.▲ (TBD) The reporting threshold is 0.1%.

\(^{g}\)Total degradation products does not include 4-epiminocycline.

ADDITIONAL REQUIREMENTS
• Packaging and Storage: Store in tightly closed containers at controlled room temperature.

• Labeling: When more than one Dissolution test is given, the labeling states the Dissolution test used only if Test 1 is not used.

• USP Reference Standards (11)
  USP Minocycline Hydrochloride RS
