In accordance with the Rules and Procedures of the Council of Experts, the Small Molecules 2 Expert Committee has revised the Olmesartan Medoxomil Tablets monograph. The purpose of this revision is to add *Dissolution Test 5* to accommodate FDA-approved drug products with different dissolution conditions and/or tolerances than the existing dissolution test(s).

- *Dissolution Test 5* was validated using the Kromasil C18 brand of column with L1 packing from Akzo Nobel Separations. The typical retention time for olmesartan medoxomil is about 2.2 min.

The Olmesartan Medoxomil Tablets Revision Bulletin supersedes the currently official monograph.
