

## Potassium Chloride Extended-Release Tablets

<b>Type of Posting</b>	Revision Bulletin
<b>Posting Date</b>	30-Jul-2021
<b>Official Date</b>	1-Aug-2021
<b>Expert Committee</b>	Small Molecules 5

In accordance with the Rules and Procedures of the Council of Experts, the Small Molecules 5 Expert Committee has revised the Potassium Chloride Extended-Release Tablets monograph. The purpose of this revision is to add *Dissolution Test 8* to accommodate FDA-approved drug products with different dissolution conditions and/or tolerances than the existing dissolution test(s).

- *Dissolution Test 8* was validated using the IC Pak Cation M/D brand of column with L55 packing. The typical retention time for potassium is about 3.5 min.

The Potassium Chloride Extended-Release Tablets Revision Bulletin supersedes the currently official monograph.
