In accordance with the Rules and Procedures of the Council of Experts, the Small Molecules 1 Expert Committee has revised the Rifabutin Capsules monograph. The purpose of this revision is to widen the *Acceptance criteria for Any unspecified impurity* in the test for *Organic Impurities* from NMT 0.20% to NMT 0.5% to accommodate FDA-approved drug products with different limits.

Existing references to reagents and reagent names have been updated for consistency with official reagent entry names.

The Rifabutin Capsules Revision Bulletin supersedes the currently official monograph.
