| Official Date | 1-Jun-2024 |
| Expert Committee | Simple Excipients |

In accordance with the Rules and Procedures of the Council of Experts, the Simple Excipients Expert Committee has revised the Succinic Acid monograph. The purpose of this revision is to revise the *Acceptance criteria* in the *Definition* and *Assay* from NLT 99.0% and NMT 100.5% to NLT 98.0% and NMT 102.0%. This range is more suitable for the HPLC procedure employed in the *Assay*.

The Succinic Acid Revision Bulletin supersedes the currently official monograph.
