In accordance with the Rules and Procedures of the Council of Experts, the Small Molecules 1 Expert Committee has revised the Trimethoprim Tablets monograph. The purpose of this revision is to add *Dissolution Test 2* to accommodate FDA-approved drug products with different dissolution conditions and/or tolerances than the existing dissolution test(s). *Labeling* information has been incorporated to support the inclusion of *Dissolution Test 2*. Additionally, minor editorial changes have been made to update the monograph to current *USP* style. Existing references to reagents have been updated for consistency with the reagent entry.

The Trimethoprim Tablets Revision Bulletin supersedes the currently official monograph.
