

USP–NF Online: Official Dates for Monographs in Redesigned Format

Type of Posting: General Announcement

Posting Date: April 29, 2022

Beginning with the June 1, 2022 release of *USP–NF Online*, USP will change how redesign-only Documentary Standards appear in the online platform. A redesign-only revision indicates that the file has been updated to the current USP style with no changes or revisions that impact the monograph content. Previously, the official date of these files would be unchanged from their original publication. Now, each file will be published with a “To Be Official” status and will become official six months after posting.

The following statement will be included in each redesign-only file: **“This monograph has been updated to the current *USP* style. No revisions or changes to tests have been made.”**

The following list includes impacted Documentary Standards:

- PROCAINE HYDROCHLORIDE INJECTION – Posted June 1, 2022; Official December 1, 2022
- PROCAINE HYDROCHLORIDE AND EPINEPHRINE INJECTION – Posted June 1, 2022; Official December 1, 2022

Should you have any questions, please contact Marian Lydon (myh@usp.org).
