

## Pharmacopeial Forum 44(3) [May–Jun. 2018]: Eriochrome Black T

**Type of Posting:** Publication Correction

**Posting Date:** 06–Jul–2018

USP recently discovered an error with the Eriochrome Black T proposal in *Pharmacopeial Forum 44(3)* [May–Jun. 2018]. One of the proposed changes was absent from the reagent proposal. The proposed addition "Dilute 10 mL of this solution with water to 1 L." should have appeared after the second sentence in Magnesium standard solution.

USP apologizes for any inconvenience this may have caused. The corrected proposal will post in *Pharmacopeial Forum 44(5)* [Sep.–Oct. 2018].

Should you have any questions, please contact Margareth Marques, Principal Scientific Liaison, Science-General Chapters (301-816-8106 or [mrm@usp.org](mailto:mrm@usp.org)).
